Estimated size of noncovered population	✓	
Use of incentives	✓	
What incentive was provided (filter on previous)	✓	
Quality control summary	✓	
% respondents removed due to quality checks (filtered on above)	✓	

The Roper Center Transparency Score Project is intended to measure disclosure of key elements of survey research. The Transparency Score is **not** an indicator of data quality. Transparency Project scores are calculated as follows: (10 points for providing a dataset+2 points for every other applicable core item+1 point for every applicable additional item)/(total possible points) X 10. Studies with a score >=9 and <=10 greatly exceed Roper Center requirements; scores >=8 and <9 exceed requirements; and scores >=6 and <8 meet Roper Center requirements.
